*Social Housing Not Social Cleansing*

# The Housing Bill marks the end of social housing

- Council tenancies will be for 2 to 5 years instead of for life — with no right to pass it on to your children.
- Landlords will have access to tenant's personal income info and if households earn over £30,000, (£40,000 in London) they will be hit with a **PAY-TO-STAY TAX** for the difference between their social rent and the market rent.
- Councils will be forced to sell 'high value' properties whenever they come vacant. Housing Association tenants will get the right to buy, so reducing stock further
- Private renters and Travellers will have less housing rights.
- Developers will have to build 'starter homes' for sale instead of 'affordable' homes for rent. Starter homes will be worth £250,000 (£450,000 in London) and sold at a 20% discount – but only to people with money to afford them!

**The Housing Bill condemns millions more to a lifetime of insecure private renting. It is a charter for estate demolition and more property speculation driving up rents and house prices.**
